

# Ignite™ Supplier Certification

## A Sleek Solution to Keep Supplier Documentation Up-to-Date

Your quality team needs an affordable supplier certification solution to save time while getting better results, not another time-consuming manual process or a software that is too expensive and unwieldy for your business. With Ignite™ Supplier Certification, now there's an affordable, simplified solution for collecting supplier docs, getting a complete and at-a-glance view of every assigned supplier task, and viewing material certification status.

### Benefits

#### Identify Approved Materials Fast

Create a single source of truth and find supplier, location, and material status with the at-a-glance view or using a search bar.

#### Quickly Check Task Status

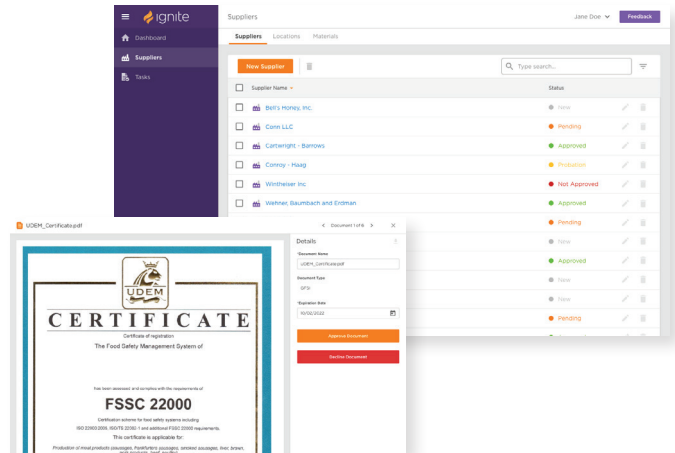

Reduce risk and ensure supplier compliance with clear views into which tasks are due soon and which tasks are overdue.

#### Reduce Admin Activities

Spend less time searching for docs in email, stop updating separate spreadsheets, and reduce data entry, so you can focus on your real job — quality management.

#### Leave Supplier Implementation Behind

Never reset a password or system train suppliers again with a logged-out and secure email-based experience for suppliers to submit docs and info.

### Does This Sound Familiar?

*“My team needs to automate the supplier qualification and document expiration process without spending a million dollars.”*

## Proven Solutions for Quality, Safety & Compliance

## Key Features

### Single View of All Suppliers

Quickly see task and certification status for all suppliers in a single, at-a-glance view, and easily drill down to view by supplier location, supplier and material.

### Document Management

Create a searchable single source of truth with easy document organization, helping you gain visibility at the supplier, supplier location, and material levels.

### Unlimited Docs & Photos Upload

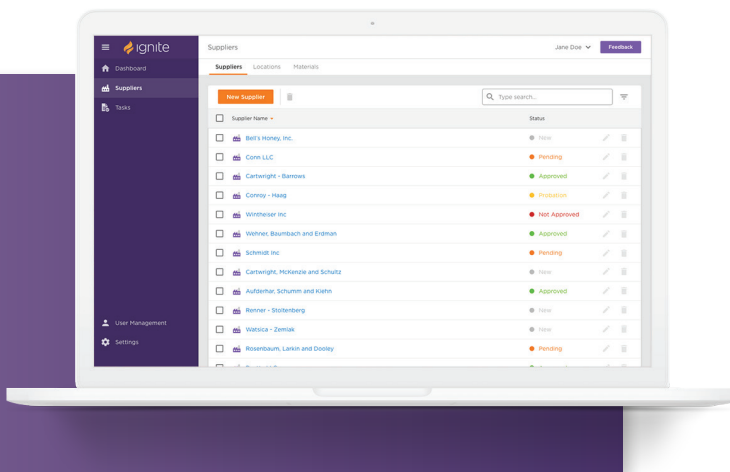

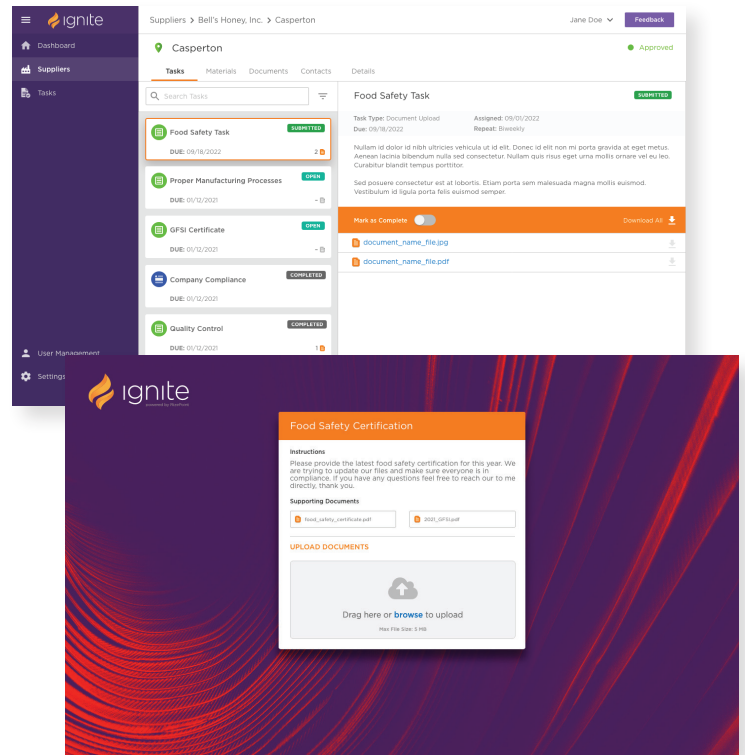

You and your suppliers can upload an unlimited number of certifications, documents, and photos with no extra steps for document organization.

### Email-Based Supplier Experience

Save hours of admin time with a secure logged-out supplier experience via our software that requires no supplier training or resetting passwords.

### Recurring Task Set Up

Never miss a due date with the ability to set recurring tasks on a daily, weekly, monthly, yearly, or multi-year basis.
